Java

```java
class Solution {
    public int[] longestCommonPrefix(String[] words) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string[]} words
 * @return {number[]}
 */
var longestCommonPrefix = function(words) {

};
```

TypeScript

```typescript
function longestCommonPrefix(words: string[]): number[] {

};
```

C++

```cpp
class Solution {
public:
```

```cpp
    vector<int> longestCommonPrefix(vector<string>& words) {

    }
};
```

C#

```csharp
public class Solution {
    public int[] LongestCommonPrefix(string[] words) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun longestCommonPrefix(words: Array<String>): IntArray {

    }
}
```

Go

```go
func longestCommonPrefix(words []string) []int {

}
```
